

## EVORA, ALENTEJO, PORTUGAL - CARTUXA

The 2021 vintage meets Cartuxa's strict quality criteria and shows great potential to develop.

From a climatic point of view, a rainy winter, sunny spring, and smooth summer allowed the vines to show a balanced development throughout 2021.

Grapes matured slowly and showed great potential. Picking took place with good weather conditions, and when the September rain came, all the grapes had been harvested. Most of the picking is done manually and in daylight (all the white grapes and 75% of the reds), leaving around 25% of the reds to be automatically picked.
